WORK EXPERIENCE

Technical Product Manager | DHF Platforms, Vietnam, Singapore

Jul 2024 – Now

DHF Platforms is a trusted supplier of fresh produce in Vietnam. I led engineers in an Agile environment to build an ERP system from scratch, transforming manual workflows in warehouse, production, and supply chain operations into an integrated digital platform, driving operational efficiency and cross-functional collaboration.

- Optimized supply chain operations and production workflows, achieving 3x improvement in inventory update and a 90% reduction in reporting errors, by designing and implementing an ERP system tailored to operational needs.
- Centralized fragmented data from ERP, CRM, and B2B reports into a unified data warehouse, enabling real-time tracking of north-star metrics and KPIs through scalable ETL processes and comprehensive data mapping.
- Defined and prioritized the 2025 product roadmap to achieve 200% GMV growth, focusing on scaling operational workflows and launching a farm application for suppliers to enhance crop quality, productivity, and traceability.
- Developed a cohesive UI/UX design system in Figma, enhancing usability and platform consistency, measured by improved stakeholder satisfaction through iterative feedback loops.

Product Manager | Peeba (YC23), Indonesia, Vietnam

May 2023 – Nov 2023

Peeba is a one-stop B2B wholesale marketplace in Asia. I co-led with the CTO to manage a team of 10 engineers, QA, Product Designer, and Product Marketer to deliver weekly sprint outcomes, improve the current market, and find Product Market-Fit in the new Indonesian market.

- Enhanced UI/UX of products by conducting experiments such as implementing a new sign-up flow that increased conversion rates by 26%.
- Led the development of pivotal features, encompassing inventory management, a tiered pricing system, tailored to the business structures of brands, flexible payment methods for local markets, and the integration of a buy-now-pay-later scheme with third-party services.
- Accomplished 3 comprehensive market research initiatives in Indonesia, gathering insights through on-field talking, surveys, and in-depth interviews. Informed business decisions and shaped product directions based on collected feedback.
- Collaborated with the business team to test and refine key strategies, introducing a wholesale subscription model, one-year free shipping, and a Direct Sales App (SaaS) for brands to enhance sales efficiency. Achieved a remarkable \$17,000 in GMV for one brand within just 3 weeks through the implementation of the Direct Sales App.

Product Lead, Growth | MoMo, Ho Chi Minh (Vietnam)

Mar 2020 – Apr 2023

MoMo is Vietnam's top e-wallet and the country's 4th unicorn. I led and developed a product growth team of 4 associates. In 3 years, my team and I launched 6 large initiatives (each with a \$1,000,000 investment). As the deputy project manager for each campaign, I led a development team and communicated with about 200 cross-functional stakeholders in order to accomplish a number of growth metrics.

Among the campaigns, "Lắc Xi 2023" was the annual largest gamification campaign with over 12 million users:

- Achieved a 1.7x increase in daily transaction numbers through the implementation of multi-source funds. Post-campaign, daily transaction volume was 1.5x higher than pre-campaign average volume.
- Successfully educated the financial hub to 12 million users by providing multiple sources of funds and flexible payment choices.
- Coordinated with the engineering manager to develop a cloud platform for the game that can manage 10,000 connections during a room battle, utilizing the Google Cloud Platform.
- Established a document about [LAWs of UX](#) applied to build gamification features in Fintech to enhance user engagement.

Engineering Manager | *SaveMoney (Insurance Startup), Vietnam***Oct 2018 - Feb 2020**

- Increased product quality and execution speed by 50%, measured by faster deployment and improved team efficiency, by establishing cross-functional workflows with Scrum and ensuring clear communication across a team of 11.
- Improved team cohesion and adaptability to feedback, resulting in reduced development timelines and increased stakeholder satisfaction, by implementing agile practices.
- Delivered new microinsurance products successfully, measured by meeting project deadlines and launching on schedule, by leading a team of product owners, engineers, and designers, and holding regular workshops to foster collaboration.

Senior Fullstack Software Engineer | *Vietnam and the Philippines***Feb 2015 - Feb 2020**

- Collaborated with a global team across the Philippines, US (Florida, and other regions) to enhance the Disney Cruise Line reservation tracking system, ensuring real-time updates and operational accuracy while adapting to US working styles and overnight schedules to meet deadlines.
- Designed and implemented scalable web-based solutions, including Warehouse Management, CRM systems, and cloud-based insurance platforms, using AngularJS, ReactJS, Node.js, GCP, and aligning technical solutions with business goals to optimize performance and reliability.
- Improved full-stack application scalability and efficiency, leveraging CI/CD pipelines, Kubernetes, and SQL databases, reducing downtime and enhancing deployment speed.
- Translated business requirements into technical solutions by coordinating with business analysts and product owners, ensuring alignment with client needs and user expectations.

LEADERSHIP and AWARDS

- Awarded 40% scholarship in Leadership & Management, Master in Public Policy, Fulbright University VN.
- Accomplished a certificate of ABG Young Leaders Program 2022 in “Leadership in the New Normal.”
- Awarded first place in the MOMO INNOVATION CONTEST 2022 for "Building Long-Term Engagement Contents of Gamification in Fintech."
- Won a MoMo company's prize for [PROJECT OF THE YEAR 2021](#) with the campaign “MoMo City 2021.”
- Finished a 42km full marathon 3 times and donated blood 32 times.

EDUCATION**Business Intelligence Program** | [Mastering Data Analytics](#), VN**Nov 2024 – 2025**

- Analytics techniques, Dashboard insights, Storytelling, Business statistics and Analytical thinking.

Leadership & Management | *Master in Public Policy, Fulbright University VN* **Oct 2022 – 2024**

- Subjects included leadership and management, negotiation, data science, quantitative methods, microeconomics, macroeconomics, public policy, law, budgeting and financial management.

Software Engineer | *Posts and Telecommunication Institute of Technology***Oct 2010 - Jan 2015**
