Summary

Technical Product Manager with 5+ years of experience in the banking and fintech industries, specializing in SaaS platforms, API payment solutions, and B2C microservice products. Led API integrations with bank partners and experiences in supported developer communities with Microsoft and Googles. Skilled in Agile methodologies, I collaborate with multinational teams to deliver product roadmaps and innovative solutions that meet end-user needs. Now, I'm eager to bring my technical and business expertise help company create impactful products.

Work Experience

Senior Technical Product Manager at SeaMoney & ShopeePay

2022 - now

Country responsible for managing 3 digital lending products (buy now pay later, cash loan)

- **API Integration & Partnership Management:** Led API integrations with 3+ banks partners, ensuring business expansion, regulatory compliance, process automation, and real-time data sharing between ShopeePay and core banking systems. Managed full integration from ideation to rollout.
- **Cross-Platform Product Management:** Oversaw product features across web (React), iOS, and Android (React Native & Native), including NFC chip scanning (aligned with new regulations), Push Notifications, and Authentication Services (Apple ID, Face ID, Touch ID).
- **Team Leadership & Product Growth:** Managed a team of 5+ product managers, collaborating with stakeholders to prioritize features and drive product launches, resulting in a 5% GMV increase and a 45% boost in conversion rate within two quarters.
- **Operational Efficiency & Quality Assurance:** Partnered with 5 cross-functional teams to automate processes, reducing manual operations by 70%. Ensured 95% feature quality through testing, troubleshooting, and training teams during product rollouts.

Product Owner at MTI Technology

2020 - 2022

Successfully delivered 2 fintech products (payment app, eKYC solution)

- **Product Backlog & Team Leadership:** Managed the product backlog for two Large Scale Scrum (LeSS) teams (8 members each) for 3 years, and led a team of 10+ Product Owners, ensuring efficient backlog prioritization and alignment with business goals.
- **Product Design & MVP Development:** Led product design efforts, creating Product Personas, Customer Journey Maps (CJM), and User Story Mapping (USM), while defining MVP scope and release plans for 50+ sprints.
- **Customer Conversion Growth:** Achieved a 15% increase in new customer conversions within one year by optimizing the onboarding process and enhancing product features post-launch.

Onsite Business Analyst at FPT Software, Fintech Dept.

2016 - 2020

Contributed to 10 software development projects with customer NPS>90

- **Application Development & Optimization:** Built 5+ new and rebuilt 5+ existing web portals for banking platforms, creating a collaboration tool that reduced reliance on Excel and SharePoint across departments.
- **Data Modeling & Reporting:** Developed 3+ dynamic data models that allowed users to customize and generate reports, improving accessibility and efficiency.
- **Stakeholder Management & Requirement Gathering:** Acted as the main contact between the Vietnam team and US stakeholders, ensuring adherence to requirements throughout the project lifecycle. Conducted onsite visits for detailed requirement discussions and data mapping analysis.
