

OkBuddy Product Roadmap

Solution Ideation & Craft

MVP 1.01

Big Hairy Question

"Why is this 10x better than what people are already doing or using?"

OKR

Goals

- Launch a usable MVP that proves real user behavior (not hypothetical interest).
- Demonstrate that users not only try but return, activate, and use the product meaningfully.

Key Metrics

- Solution appeal: Net Promoter Score (NPS) > 40
- "where has this been" sentiment >40% || Sean Ellis' "40% would be very disappointed" test
- 20–30% of users express willingness to pay in interviews/surveys
- 15–25% conversion on waitlist page with pricing visible
- ≥15% of pre-launch users submit real pre-payment details or refundable deposits (ideal)"

MVP Testing

MOAT 2.01

OKR

Goals

- Launch a usable MVP that proves real user behavior (not hypothetical interest).
- Demonstrate that users not only try but return, activate, and use the product meaningfully.

Key Metrics

- "Activation rate >40%
- Retention:
 - D1: 30-40%
 - D7 >25%
 - D30: 5-10%
 - DAU/WAU ratio >0.3

Willingness to pay:

Soft Success Metrics (Signs of Momentum):

- 10% of activated users express intent to upgrade (not just use)
- 15% trial-to-paid conversion among first cohort
- 25% clickthrough rate on upgrade or pricing pages
- Users engage pricing content (compare plans, explore limits)

Hard Success Metrics (Signals of Real Revenue Traction):

- Trial-to-paid conversion $\geq 15\text{--}20\%$ (or higher depending on model)
- Paying user activation rate $\geq 40\%$ (they are not just paying—they're using)
- User willingness to pay $\geq$ pre-defined price anchor (e.g. $\geq \$10/\text{mo}$)
- <60-day payback period on early paid acquisition (if testing ads at MVP level)"

Key Deliverables

Problem/ Need	Solution/ Feature	Pain Severity/ Impact	Cost	Priority
		High		P0
